

ARTWORK GUIDE FOR EXTRA CARDS 2021

DAILY SUBJECTS & ACTIVITIES

The Daily Classroom Timetable was developed over 10 years ago, and since then there have been many changes to school curriculum subjects, educational programs and school activities.

Today there are more than 400 extra cards available to purchase.

When the timetables first evolved, there were two guides for cards. A large format for the larger cards used in classrooms which required the text to be legible from a greater distance and a small format for personal timetables used at school and in the home. The new guide has been developed to be used when creating artwork for all new cards to ensure a consistent look for the classroom and home. From now on, all new cards will be created using the guide shown below. Examples of the new guide are shown on the right,

FONT SIZES

There are 3 font sizes used for best legibility when reading the cards from a distance. Large, medium and small. This ensures for a reasonable sized image area for each card.

Please note: the diagram below is a guide only. New card artwork can be generated going outside the guidelines shown below, ie. the font size can be altered from the 3 mentioned below and the card can be image free when required.

InitialLit using the large font size.

Gardening using the medium font size.

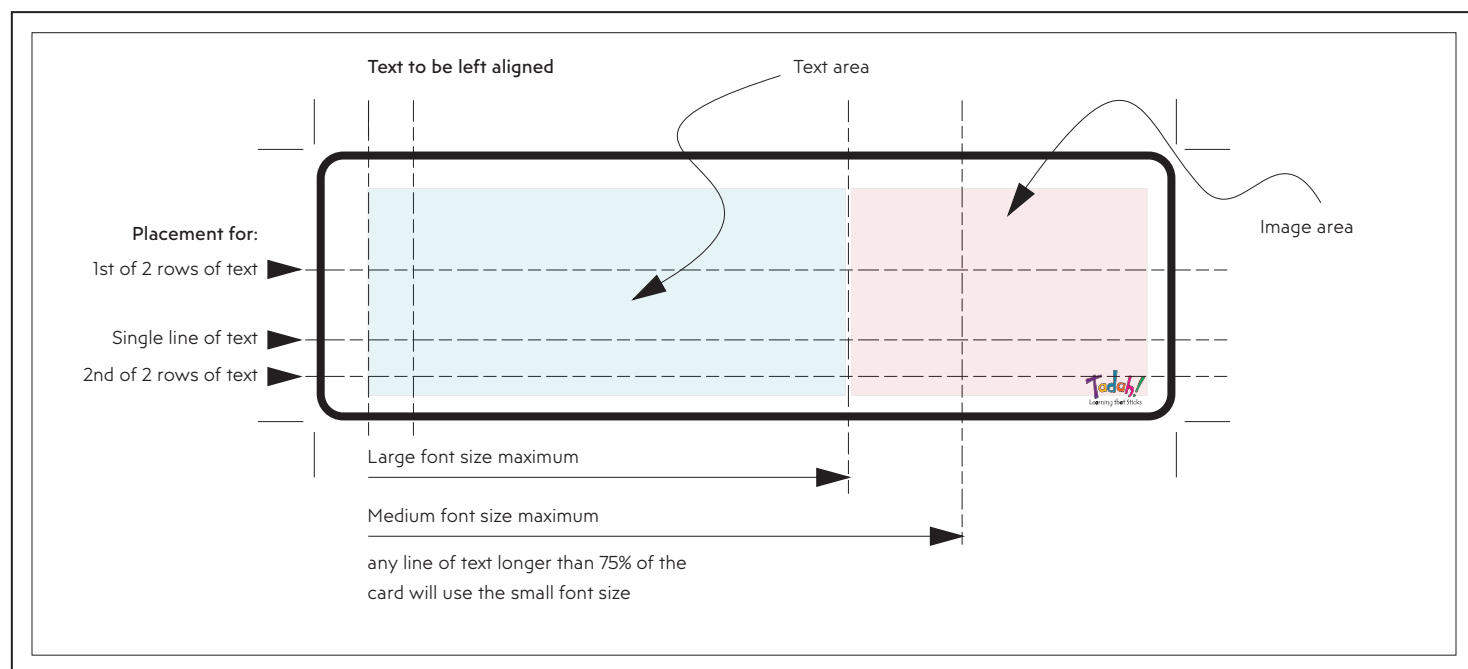

Comprehension using the small font size.

Figurative Language using the medium font size.

Comprehension and Fluency using the small font size.
